

Introduction to the Publication Process in Peer-reviewed Journals

Prof. Dr. Peter Letmathe
Lehrstuhl für Controlling

Objectives

Theory: Gaining deep knowledge about the publication process as a key for a successful scientific career

Interaction: Exchange of different opinions and promotion of critical thinking

Practice: Use of practical examples and exercises to enable students to implement practical knowledge

Networking: Establish good relationships which can lead to mutual support during and after the course

Citizenship: Learning about balancing contributions to and gains from the research community

Fun: Balancing fun and hard learning during the course

Research as a Process

Preliminary Schedule

	Mo	Tu	Wed	Thu	Fri
Morning Sessions 8.30 am – 12.00 pm	What is good research	Discussion of research questions	Theoretical foundation of research questions	<i>Paper Reviews (group work)</i>	<i>Preparing a presentations for a conference (group work)</i>
	Research processes	Research methodologies Target journals	<i>Theoretical foundations of research questions (group work)</i>	Discussion of reviews	
Afternoon session 1 1.30 -4.00 pm	<i>Formulation of research questions (group work)</i>	<i>Identification of target journals and publication strategies (group work)</i>	Discussion of the theoretical foundations	Marketing of papers (types of conferences, networking)	Presentations
Afternoon session 2: 4-5.00 pm		Discussion of target journals / publication strategies	Introduction to the review process	Research as a team process and problems within research teams	Presentations and Wrap-up

1. What is Good Research?
2. Methodologies and Target Journals
3. Research Questions and their Theoretical Foundation
4. Review processes
5. Market your Papers
6. Be a Good Citizen within the Research Community
7. Presentations and Wrap-up
